

## ***A Prayer at Spring Vernal Equinox***

O God of Creation,  
Spring is re-awakening!  
So awaken us to grow  
That our hearts may be open  
to the abundance  
And the wonder of your creation.

We bring our thanks  
As the days grow lighter  
And the Earth grows warm.  
Help us know you as the greening force.  
May we recognize the promise of rebirth  
Within us, and Outside Us all.

God stir us to our re-awakening  
To be present to all that is  
So we might best see  
All that might be.
